Company Overview

Recognition Robotics is an independent, American company producing innovative robotic guidance technologies. RRI's solutions assist and enable the transformation of

traditional automation practices to new methods that reduce waste and downtime, while promoting a safer, cleaner work environment. With a track record of successful guidance applications dating back to 2009 and nearly 400 applications deployed throughout North America to date, RRI has proven itself to be more than just another vision startup. Today, our products are heavily focused in automotive applications while continuing to expand into aerospace, and enter the food and beverage, general manufacturing, and medical fields.
